

Workshop : pupils' motivation

Objective = to identify possible causes of demotivation/disengagement of pupils for school work

1) video analysis

Video 1: the escalator failure <https://www.youtube.com/watch?v=BEGBalqiSN8>

Why do the characters react this way? What would be the least expensive attitude? what could be the why it's not the one chosen ?

Can we draw a parallel with the pupils in the class ?

Video 2: the key to school motivation

<https://www.youtube.com/watch?v=FsXtXkBJzIA> What can be the reason for a pupil's passive attitude in school work ?

Video 3: Acquired impotence <https://www.youtube.com/watch?v=j9I95BjsINc>

How do we act on sense of personal efficiency ? What examples everyday life ?

2) building a mind map

Build a group mind map expressing all the reasons why you think a pupil lacks motivation at school.

Group these reasons into categories and, if possible, investigate each of them (what is the origin of each of the reasons?)

Compare the mind map constructed with the document below and identify the major causal fields not explored in the mind map. Add them to the built mind map.
